

Name _____

Supervolcano

Due at the end of the film or by Tuesday, Nov. 22nd

1) List several things shown in this film that are geologically correct (at least 5).

2) List several things shown in this film that are geologically *incorrect* (at least 5).

3) Name several ways the volcano at Yellowstone is different from the composite volcano depicted in *Dante's Peak*.

Name _____

4) Why is a large eruption at Yellowstone so potentially dangerous?

5) Evaluate the statement “Yellowstone erupts (on average) every 600,000 years. It last erupted more than 600,000 years ago so we are overdue for an eruption”.
