

(0) Below is a contour map of temperature.  
At which location below is the temperature  
gradient the *largest*?

- (A) location A
- (B) location B
- (C) location C

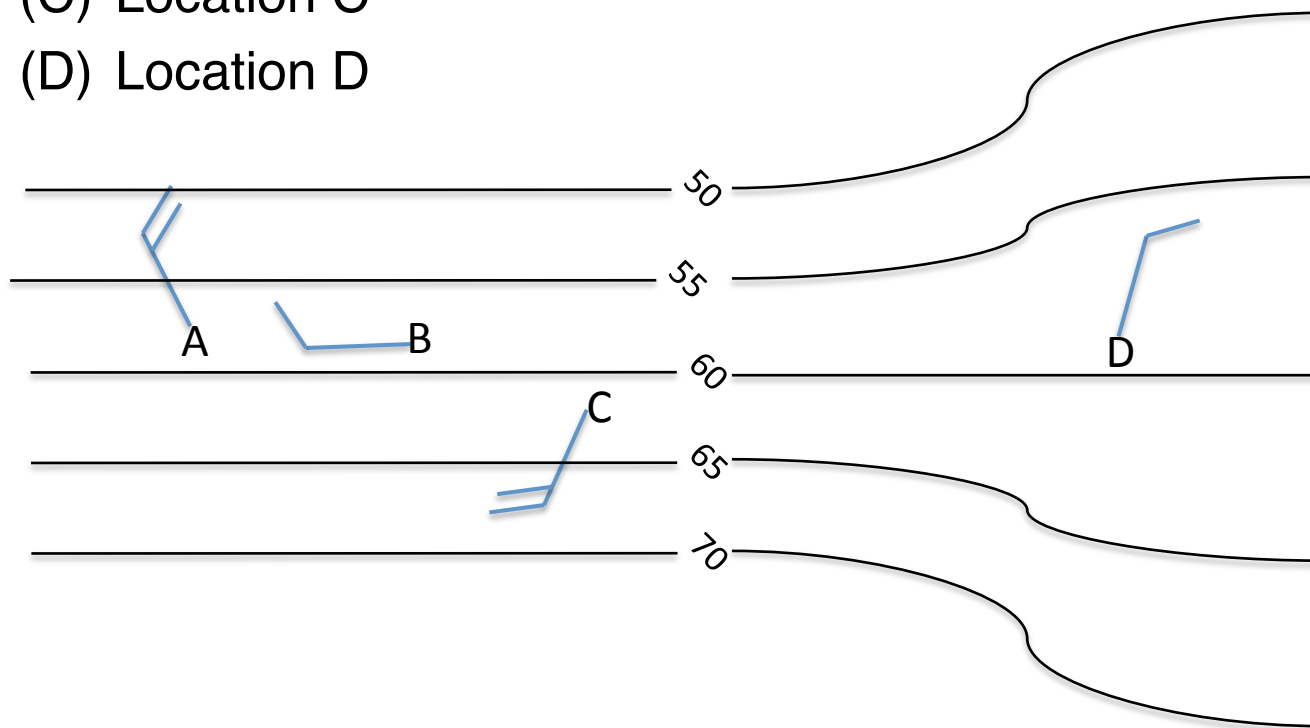

(1) Below is a contour map of temperature. Winds are shown at four locations. At which location is relatively strong cold advection occurring?

- (A) Location A
- (B) Location B
- (C) Location C
- (D) Location D

(2) At which location is there *no* temperature advection occurring?

- (A) Location A
- (B) Location B
- (C) Location C
- (D) Location D

(3) At which location is relatively strong *warm advection* occurring?

- (A) Location A
- (B) Location B
- (C) Location C
- (D) Location D
